LIQUID THERMAL INSULATION

Cool the roof.  
Cool the house.  
Cool the costs.  
Cool the globe.

Australian owned and made • Affordable luxury • Environmentally sensitive formulation • Guaranteed finest quality and spreadability

luxury paints

# coolit<sup>it</sup>ceram

So what's all the fuss about?

Luxury Paints coolit<sup>it</sup>ceram will not only give you the best looking roof in the neighbourhood, it will reduce the temperature in your living area by 8 - 12°C. This revolutionary paint system has tiny ceramic beads, which serve to ease the heat burden on your roof, meaning you can live in cool comfort.

Unlike regular paint, coolit<sup>it</sup>ceram also cools the globe, by reducing greenhouse gas generation. By not using your air conditioning as regularly, you will notice significant savings on electricity cooling costs as well – up to 60%!

Due to the carefully blended combination of latex and acrylics, coolit<sup>it</sup>ceram can be applied to almost any properly prepared surfaces. It will adhere to, and remain flexible to metal, Colorbond®, concrete tile or terracotta tile.

Now available in a range of colours, including the traditionally 'hot' darker shades, coolit<sup>it</sup>ceram can even be applied to exterior walls that receive excessive sunlight exposure. Talk to your Luxury Paints consultant for specific recommendations.

## Features
