

PAINT FOR OUR PLANET

Preventing the spread of Germs

PaintPRO®

Anti Bacterial

With it's integrated antibacterial properties,
PaintPRO® can contribute significantly to
minimising the spread of disease and infection.

Preventing the spread of Germs

Established in 1982, Luxury Paints has built a reputation for manufacturing premium products including quality interior and exterior paint finishes. Recently, this Australian owned and operated company has embraced its environmental responsibility, developing exciting new coating products, with an environmentally sensitive approach.

The innovative **PaintPRO®** range of products offers quality paint you have grown to expect from Luxury Paints combined with a scientifically formulated non toxic ionic silver additive to deliver an antibacterial paint that prevents and kills bacteria, mould, mildew and fungus growing on painted surfaces.

PaintPRO® significantly minimises the spread of disease and infection including antibiotic-resistant "Super Bugs" like MRSA, Salmonella, E. Coli and others.

Luxury Paints **PaintPRO®** range is available in a range of sheen levels ranging from gloss to low sheen and can be tinted to a full range of colours.

Independent laboratory testing (JIS Z 2801:2000) certifies **PaintPRO®** products meet the highest international manufacturing and antimicrobial standards.

Eliminates surface Bacteria

PaintPRO® kills bacteria on contact (99.995% certified), and prevents odours and bacteria from infecting work, living, recreational, medical, care, dining, hospitals, restaurants, education and other environments.

Lifetime Guarantee

PaintPRO® in conjunction with Luxury Paints, comes with a guarantee for the antimicrobial component of the product for the lifetime of the paint.

Talk to your Luxury Paints consultant today to find out how you can help protect your environment.
